

# SHRI DATTA MADHIRA

Dallas, TX | (617) 602-5429 | sridattamadhira1919@gmail.com | [LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Software Engineer with **4+ years** building fault-tolerant, cloud-native systems in fintech, logistics, and biotech — migrating **\$2B+ platforms** to microservices and engineering Kafka pipelines handling **400M events/day** at 5ms latency. **I bridge product thinking with systems design, turning business problems into scalable architectures.**

## PROFESSIONAL EXPERIENCE

### Fifth Third Bank

Dec 2023 – Present

Software Engineer · Remote

- Drove **monolith-to-microservices migration** of \$2B+ Zelle volume, collaborating with architects on system design and UX continuity.
- Built **4** Kafka pipelines (payment, user, account, balance) processing **400M events/day** at **5ms p99 latency, 99%+ success, and DLQ retry**.
- Built **6** fault-tolerant Zelle APIs (tokens, payments, profiles) with idempotent design handling **millions** of daily transactions.
- Built **10+** DB2 CRUD endpoints with idempotent, transactional integrity; drove test coverage from **3.4% to 91.1%**, resolving a critical bug.
- Deployed **3** AWS Lambdas scanning **1M** payments daily for **fraud detection** and triggering **500K+** reminders for **user engagement**.
- Provisioned **AWS Secure CloudFoundry** infrastructure via **Terraform, Jenkins** CI/CD, and HashiCorp **Vault** across dev/staging/prod.
- Containerized services with **Docker**, utilizing ECR and ECS for horizontally scalable, **zero-downtime** deployments in production.
- Led integration across **6+** teams, aligning on architecture, design, planning, and release readiness, with **0 critical failures** in production.
- Built 4 Splunk dashboards for **Kafka/service observability: success rate, latency, volume, alerts**.
- Proposed and owned release ambassador role, managing release pipelines and build versions for **10 successful releases**.

### Matson Inc

May 2023 – Dec 2023

Software Developer · Phoenix, AZ

- Migrated credentials to **AWS Secrets Manager**, remediating **10+ security** vulnerabilities and enforcing secrets hygiene.
- Built Groovy container sorting API, optimizing load/discharge sequencing and improving **operational efficiency** for **4** Alaskan ports.
- Developed Jasper Reports for gate analytics for **4** major ports, enabling **bottleneck analysis** and operational improvements.
- Implemented **failover** for Apache ActiveMQ, cutting downtime by **~25%**, and improving reliability.

### Vor Biopharma

Jan 2022 – Jun 2022

Software Engineering Co-op · Cambridge, MA

- Engineered an in-memory sequencer data store, reducing data retrieval latency by **70%** and gene analysis time to **~30 minutes**.
- Enhanced critical data pipelines with sample validation and data integrity checks, **improving experiment speed and reliability**.

### Infosys Limited

Dec 2018 – Feb 2020

Software Development Engineer · Hyderabad, India

- Led a 6-engineer team to build a **face recognition check-in system**, reducing daily employee check-in time by **30%**.
- Optimized the backend of a bank trading app using PL/SQL/DSA, **resolving bottlenecks**.

## CORE SKILLS

**Languages:** Java (8–21), Python, JavaScript, TypeScript, Groovy, Shell, **Go\***, **C++\***

**Web & APIs:** Node.js, React.js, REST, GraphQL, gRPC, HTML/CSS, Redux, **Protobuf\***, **Thrift\***

**Cloud & DevOps:** AWS (Lambda, ECS, S3, RDS, SQS, VPC, APIGW, Secrets Manager, CodeArtifact, **DynamoDB\***, **Kinesis\***), Docker, Kubernetes, Terraform, Jenkins, CI/CD, Git, LaunchDarkly, Prometheus, **Grafana\***, **OpenTelemetry\***, **Datadog\***, Azure, GCP

**Messaging:** Apache Kafka, ActiveMQ, RabbitMQ, **Apache Flink\***

**Databases:** PostgreSQL, IBM DB2, Oracle (PL/SQL), MongoDB, SQL Server, Snowflake, **Cassandra\***, **Redis\***, **Elasticsearch\***

**Frameworks:** Spring Boot, Hibernate, JPA, Gradle, Maven, MapStruct, Liquibase, Mockito, JUnit, Cucumber, HashiCorp Vault, GitHub Copilot, AI-assisted development, PyTorch/TensorFlow

**Methodologies:** Microservices, Event-Driven, Distributed Systems, TDD, Agile/Scrum, IaC, SLI/SLO, **SRE\***, **FinOps\***

## EDUCATION

Westcliff University · Irvine, CA

Master of Business Administration (MBA) | April 2028

Northeastern University — Khoury College of Computer Sciences · Boston, MA

M.S. Computer Science | May 2023 | GPA: 3.79 | Teaching Assistant (200+ students/3 courses) | Research Assistant — 802.11ad Wi-Fi

Koneru Lakshmaiah Education Foundation · Guntur, India

B.Tech. Computer Science and Engineering | May 2019 | GPA: 9.1/10 (Top 1%)

## PROJECTS

**Face Detection Attendance System** | Python, Azure, Raspberry Pi — Cutting employee check-in bottlenecks via face recognition.

**Arctic Sea Ice Prediction** | Python, Pandas, Sklearn — End-to-end data mining + ML pipeline from raw climate data to forecasts.

**F1 Race Predictor** | Python, scikit-learn, FastAPI, React — End-to-end pipeline from Ergast/OpenF1 APIs to gradient-boosted top-5 forecasts.
